<p>7. Aligning the Organization through Portfolio Management Organizations that adopt projects as a means to achieving change and delivering results often find it difficult to prioritize projects and to make best use of their resources. Many recent surveys have demonstrated that project backlog is a major issue in organizations. Portfolio management is an approach that aims to align project efforts with the corporate strategy and optimize the efficient use of resources throughout the organization. This course focuses on two aspects of the management of portfolios:</p> <ol style="list-style-type: none"> 1. The prioritization of projects and other activities, based on their contribution to organizational benefits and their achievability 2. The allocation and prioritizing of resources between those critical projects and activities in order to deliver the expected benefits <p>What the Course Covers</p> <ul style="list-style-type: none"> • Context and Framework • Portfolio Management Processes • Aligning Process Groups 	2	Las Vegas (U.S.A.)	€ 2,345

<p>8. How to Capture Customer Requirements and Develop Project Scope</p> <p>This popular course provides pragmatic techniques for capturing customer information on needs and wants, organizing and understanding the information into a requirements model, and specifying the resulting requirements so that the technical team can produce an optimal product or solution design.</p> <p>You will increase your skill in speeding delivery of the right solution and develop insights that help you delight the customer with innovative solutions. It is rich with examples that will help you recognize differences between good and bad practices.</p> <p>What You Will Learn</p> <p>Develop and enhance the contributions you make to your organization by learning to:</p> <ul style="list-style-type: none"> • Discover both spoken and unspoken requirements • Design customer-centric solutions • Increase your leadership skills so that you can work collaboratively with customers • Develop insights that will allow you to be more innovative and better serve clients • Resolve ambiguity and appreciate the contributions of non-linear thinking • Avoid commitments to impossible due dates • Ask the “three magic questions” that elicit essential information • Recognize the pitfalls that lead to enormous costs, rework and errors (The #1 mistake is confusing design with requirements!) • Appropriately use agile project techniques to increase speed, flexibility, and innovation • Organize “mind dumps” of information to retain relevant information 	2	Las Vegas (U.S.A.)	€ 2,410

<p>9. Advanced Leadership Development: Leadership, Teams, Objectives & Influence</p> <p>Leaders face unique challenges to keeping their team members motivated and aligned to the organizational or project's strategy. This difficulty is often due to the difference between leadership and authority, power and influence. Also, as leaders, we are confronted to a cruel dilemma: we can't always force people to drive their actions in a certain way, we don't necessarily hold the appropriate authority. Yet, we still need them to deliver, follow a certain path and some rules, and report on their progress.</p> <p>What You Will Learn</p> <p>Develop and enhance the contributions you make to your organization by being able to:</p> <ul style="list-style-type: none"> • Define objectives in order to empower and motivate their team members • Identify individual drivers to lead their team members • Use these individual drivers to commit and engage their team members • Identify resistance factors • Apply effective techniques to overcome any potential resistance. 	2	Las Vegas (U.S.A.)	€ 2,345
